Castle Hill Primary School
Seesaw

Seesaw- an app that supports and shares our learning.

In Reception Class we find that Seesaw is the best interactive learning platform for our teachers, parents and children. Teachers, children and families work together to demonstrate their learning over their first year at Castle Hill Primary School. As parents you will get notifications about new journal entries and class announcements. You can then support and encourage the skills your child is building. You will also be able to see your child's learning and communicate with the teacher in one place. The posts can be a drawing, photograph, video or a voice recording.

Tips and Tricks

Please watch our older children show you how easy it is to set up on your device. How to use Seesaw
