

A Guide for Home Learning CLIC 6

## Introduction - CLIC 6

In school, each week, children complete a CLIC challenge. The answers that they provide tell their teacher what skils they understand and allow teachers to focus on teaching the skills that they don't (as well as new skills that will be taught). If your child completes their challenges online at school, you may have been sent a link to log on at home. This pupil log on only allows children to complete one challenge a week. We are currently building a new pupil area, which will help with home learning.

This guide provides you with a copy of a CLIC challenge, a description of the skill each question is challenging and some sample resources for each question to help with home learning. (A description of each of these resources is on the next page.) The key is to keep it fun, no pressure and limit the time to less than 20 minutes a day, unless your child wants to carry on!

Please seek and follow advice from your child's teacher and school!

## What skill does each question challenge?

## Question 1

I can partition a 2 d number

## Question 2

I can understand numbers to 20

## Question 3

I can count in 2 s

## Question 4

10s / 20s / 50s / 250s

## Question 5

1s / 2s/5s/25s

## Question 6

I know the Fact Families for 1d + 1d facts
Question 7
1 can add 2 or 3 to a number up to 20
Question 8
I can add a 1d number to a number to 20

## Question 9

I can take 2 or 3 from a number to 20
Question 10
I can take a 1d number from a number to 20

## Remember To's

Every step of learning (skill) in Big Maths has 'Remember to...'s. These are simple reminders for children to 'Remember to' do this, this, etc...

In Big Maths, we have divided complicated skills into small steps, provided 'Remember to...'s and examples to keep it simple for children.

A Progress Drive is a collection of skill steps that progress a child's learning to the point of mastering the larger objective.

## Repeat Sheets

Repeat sheets contain a number of questions (usually 10) that you can use for repeat practice of a particular step. Please feel free to create your own repeat questions to avoid children simply memorising the questions and answers.

## Revisit Sheets

Revisit sheets contain a number of questions (usually 10) that you can use which include a unit of measure applied to the numbers (It's Nothing New!) of a particular step. Please feel free to create your own revisit questions to avoid children simply memorising the questions and answers.

## Real Life Maths Sheets

Real Life Maths sheets contain a number of questions (usually 5) where the questions have been placed into worded scenarios for a particular step, increasing the complexity and challenge further. Please feel free to create your own real life maths questions to avoid children simply memorising the questions and answers.

## Select Sheets

Select sheets contain a number of worded questions (usually 5) which no longer automatically relate to the step we are on. These increase the complexity and challenge further still. Please feel free to create your own select questions to avoid children
simply memorising the questions and answers.

## CLIC 6

The following CLIC challenge is an example for you to use to practice at home. We have included the answer sheet as well. Please feel free to create your own additional questions by changing the numbers for any that your child gets wrong. In this pack, there is additional advice for each question, with resources that can help with home learning. It is important that you use the correct challenge level as provided by your teacher.

## Question Practice Resources

## Question 1 - I can partition a 2 digit number

## Remember to:

- write the $2 d$ number
- draw the sticks
- copy the units digit
- copy the tens digit with a zero on the end

Repeat Questions

## Remember to:

- write the number
- draw the sticks
- copy the units digit
- copy the tens digit... with 'a zero on the end

(1) Partition 88
(3) Partition 66
(5) Partition 32
(7) Partition 74
(9) Partition 96
(10) Partition 39
(8) Partition 53
(6) Partition 21

## Remember to:

- write the number
- draw the sticks
- copy the units digit
- copy the tens digit... with 'a zero on the end

(1) 80,8
(2) 40,5
(3) $\mathbf{6 0 , 6}$
(4) 90,1
(5) $\mathbf{3 0 , 2}$
(6) $\mathbf{2 0 , 1}$
(7) $\mathbf{7 0 , 4}$
(8) $\mathbf{5 0 , 3}$
(9) 90,6
(10) 30,9

## Question Practice Resources

## Question 2 - I can understand numbers to 20

## Remember to:

- use your 'counting to 20 ' skills to check you are right

## Remember To:

- use your 'counting to 20 ' to check you are right

I can understand numbers to 20

(3) $13,11,15,12$
(2) $19,18,15,16$
4) $16,15,14,19$

6
12, 16, 18, 14

8
11, 19, 12, 18
$13,14,17,12$

16, 15, 14, 13

Maths Repeat Answers
 2

I can understand numbers to 20

## Remember To:

- use your 'counting to 20 ' to check you are right

## 2

## Real Life Maths Questions

## Step

INN: Fact Families

I know the Fact Families for 1d + 1d facts

## Remember to:

- copy the Learn It
- write the Switcher
- bring the total (sum) to the front, change the symbol and write the 2 switchers

Pim has 2 apples and his friend gives him 3 more. How many apples does Pim have? Write out the Fact Families.
2) There are 5 sweets in one jar and 3 sweets in another jar. How many sweets are there altogether? Write out the Fact Families.

Mully went to the shop and bought sweets for $£ 7$ and chocolates for $£ 1$. How much did it cost altogether? Write out the Fact Families.

4
Pom has 4L of water in a jug. He adds 2L more. How much liquid is in the jug? Write out the Fact Families.

What is the sum of 6 and 3 ? Write out the Fact Families.

## Real Life Maths Answers

## Step

INN: Fact Families

I know the Fact Families for 1d + 1d facts

## Remember to:

- copy the Learn It
- write the Switcher
- bring the total (sum) to the front, change the symbol and write the 2 switchers

Pim has 2 apples and his friend gives him $\mathbf{3}$ more. How many apples does Pim have? Write out the Fact Families.

Pim has 5 apples. $3+2=5,5-2=3,5-3=2$.
2) There are 5 sweets in one jar and 3 sweets in another jar. How many sweets are there altogether? Write out the Fact Families.

There are 11 sweets altogether. $5+3=8.8-5=3,8-3=5$.

Mully went to the shop and bought sweets for $£ 7$ and chocolates for $£ 1$. How much did it cost altogether? Write out the Fact Families.

4
Pom has 4L of water in a jug. He adds 2L more. How much liquid is in the jug? Write out the Fact Families.

There is 6 L in the jug. $2 \mathrm{~L}+4 \mathrm{~L}=6 \mathrm{~L}, 6 \mathrm{~L}-2 \mathrm{~L}=4 \mathrm{~L}, 6 \mathrm{~L}-4 \mathrm{~L}=2 \mathrm{~L}$.
5) What is the sum of 6 and 3? Write out the Fact Families.

The answer is $9.3+6=9.9-3=6,9-6=3$.

## Question Practice Resources

## Question 7 - I can add 2 or 3 to a number up to 20

## Remember to:

- find the starting number
- count on the right amount one jump for each number
- see where you have landed

## Repeat Questions

## Remember To:

- find the starting number
- count on the right amount, one jump for each number
- see where you have landed

I can add 2 or 3 to a number up to 20

5 $7+2=$

2) $11+2=$

10) $17+2=$

2) $15 m+3 m=18 m$

4 $4 \mathrm{~mm}+2 \mathrm{~mm}=6 \mathrm{~mm}$

10 $10 \mathrm{ml}+3 \mathrm{ml}=13 \mathrm{ml}$

## Real Life Maths Questions

Step

1 can add 2 or 3 to a number up to 20

## Remember to:

- find the starting number
- count on the right amount... one jump for each number
- see where you have landed

Pom has 16 coins and his brother gives him 3 more. How many coins does Pom have?

2
Speedy Col bought toys for $£ 15$ and sweets for $£ 2$. How much did she spend?

3
Pim has 18 ml of tea in a mug. He adds $\mathbf{2 m l}$ more. How much liquid is in the mug?

Pom is 14 cm tall. Pim is 3 cm tall. How tall are they together?

## Real Life Maths Answers

Step

## Addition

I can add 2 or 3 to a number up to 20

## Remember to:

- find the starting number
- count on the right amount... one jump for each number
- see where you have landed

Pom has 16 coins and his brother gives him 3 more. How many coins does Pom have?

Pom has 19 coins.

2
Speedy Col bought toys for $£ 15$ and sweets for $£ 2$. How much did she spend?

She spent $£ 17$.

3
Pim has 18 ml of tea in a mug. He adds $\mathbf{2 m l}$ more. How much liquid is in the mug?

There is $\mathbf{2 0} \mathbf{m l}$ in the mug.

4 Pom is 14 cm tall. Pim is $\mathbf{3 c m}$ tall. How tall are they together?

They are 17 cm tall together.

5 What is $\mathbf{1 2}$ add 3?

The answer is 15.

- count on the right amount... one jump for each number
- see where you have landed

Mully has $\mathbf{1 2}$ conkers. Pom has $\mathbf{8}$ conkers. How many do they have altogether?

Pim bought books for $£ 19$ and toys for $£ 7$. How much did he spend?

## Real Life Maths Answers

Step

I can add a 1d number to a number to 20

## Remember to:

- find the starting number
- count on the right amount... one jump for each number
- see where you have landed

## What is the sum of 15 and $4 ?$

The answer is 19.

2
Mully has 12 conkers. Pom has 8 conkers. How many do they have altogether?

They have 20 conkers altogether.

3
Pim bought books for $£ 19$ and toys for $£ 7$. How much did he spend?

He spent $£ 26$.

4
Pom is 16 m tall. Pim is $\mathbf{8 m}$ tall. How tall are they together?

They are 24 m tall together.

5
Pim has 13 g of salt on the weighing scales. He adds $\mathbf{9 g}$ more. What is the weight on the scales?

There is $\mathbf{2 2 g}$ on the scales.

## Question Practice Resources

## Question 9 - I can take 2 or 3 from a number up to 20

## Remember to:

- find the starting number
- count back the right amount
- see where you have landed

Repeat Questions

## Remember To:

- find the starting number
- count back the right amount
- see where you have landed

I can take 2 or 3 from a number to 20

5 $4-2=$

9
15-3 =

4) $5-3=$

10. $7-3=$

Repeat Answers
