

Our vision is explained for the adults in our school community in the blue box, and for the pupils in the yellow box.

Do With Not For...

Is our systemic approach to bring about long term change by-

- Understanding that there are many different perspectives
- Investing in the relationship the school has with families.
- Understanding our families' identities and drivers might be different from our own.
- Bring about first and second order change.
- Professional curiosity.

Do With Not For...

Our way of making **lasting change** is by working with each other, not just doing things for each other.

In this way everyone gets to help and learn, making the changes **stay strong** and grow.

- Through Packtypes explore that we have different ways of thinking and feeling about things. This helps us learn more and get along better with others.
- Discover the value of positive relationships between home and school.
- Know that others have different world views.
- First, use the 10 Opportunities to try something new. Second, know the power that a change can make to your life.
- Ask why to discover the information, explore the knowledge and have the power of wisdom. This will ensure you know more and remember more.
